

SIGNAGE SUBMISSION REQUIREMENTS

In order for us to review your signage, please submit the following:

- 1 A photograph/drawing of the building's elevation, showing the position and size of the proposed sign, to scale, and in the proposed position. The photograph/drawing should also show any existing signage on that elevation
- 2 A detailed drawing of the proposed sign confirming its overall size, the size of the letters and logo plus dimensions of all aspects of the sign and its support/fixings, including how the individual letters are supported and what type of fixings are proposed.
- 3 Colours of the proposed sign and backing and the existing colour of the building must be indicated in detail.

Please note that our approvals are subject to approval of the owner of the building/unit and the Body Corporate.

Approvals are also subject to Council's approval; it being noted that our approval is a recommendation to Council and does not prejudice Council at any decision it may arrive at.
